Dear Mr. Cheruku:

In response to your request, the Bureau of Labor Market Statistics has verified that 7833 Narcoossee Road, Orlando, Florida, in Orange County, Florida, is in Census tract 167.34. The area consisting of contiguous Census tracts 167.34, 167.09, 134.02, 134.06, 133, 184, 102, 189, 105, 104, 183, 187, 117.01, 117.02, 146.05, 146.08, 121, 122.02, 123.07, 122.01, 149.04, and 123.04 qualifies as a Targeted Employment Area (TEA) under the provisions of the EB-5 Investor Visa Program. The 2016 annual average unemployment rate for the area was 7.4 percent, equal to the qualifying rate of 7.4 percent for that time period (see enclosed table).

The method used to estimate the unemployment rate in this area is called Census-share disaggregation, a standard U.S. Department of Labor, BLS procedure used to calculate rates for small subcounty areas.

Since these locations are not in a rural county or in a single Census tract with a qualifying rate, the enclosed combination qualifies as a Targeted Employment Area due to its high unemployment rate.

Please call Demetria Rollins at 850-245-7218, if you have any questions.

Dear Mr. Schoenfeld:

In response to your request, the Bureau of Labor Market Statistics has verified that 1400 State Street, Sarasota, Florida, in Sarasota County, Florida, is in Census tract 1.01. The area consisting of contiguous Census tracts 1.01 and 1.02 qualifies as a Targeted Employment Area (TEA) under the provisions of the EB-5 Investor Visa Program. The 2016 annual average unemployment rate for the area was 9.5 percent, above the qualifying rate of 7.4 percent for that time period (see enclosed table).

The method used to estimate the unemployment rate in this area is called Census-share disaggregation, a standard U.S. Department of Labor, BLS procedure used to calculate rates for small subcounty areas.

Since these locations are not in a rural county or in a single Census tract with a qualifying rate, the enclosed combination qualifies as a Targeted Employment Area due to its high unemployment rate.

Please call Demetria Rollins at 850-245-7218, if you have any questions.

Sincerely,

Dear Mr. Shen:

In response to your request, the Bureau of Labor Market Statistics has verified that 2650 Lajuana Boulevard, Wesley Chapel, Florida, in Pasco County, Florida, is in Census tract 321.07. The area consisting of contiguous Census tracts 321.07, 321.08, 329.04, 330.14, 330.11, and 330.07 qualifies as a Targeted Employment Area (TEA) under the provisions of the EB-5 Investor Visa Program. The 2016 annual average unemployment rate for the area was 7.6 percent, above the qualifying rate of 7.4 percent for that time period.

The method used to estimate the unemployment rate in this area is called Census-share disaggregation, a standard U.S. Department of Labor, BLS procedure used to calculate rates for small subcounty areas.

Since these locations are not in a rural county or in a single Census tract with a qualifying rate, the enclosed combination qualifies as a Targeted Employment Area due to its high unemployment rate.

Please call Demetria Rollins at 850-245-7218, if you have any questions.

Sincerely,

Adrienne Johnston, Chief
Bureau of Labor Market Statistics

Dear Ms. Atteberry:

In response to your request, the Bureau of Labor Market Statistics has verified that 2302 East Semoran Boulevard, Apopka, Florida, in Orange County, Florida, is in Census tract 175.03. The area consisting of contiguous Census tracts 175.03, 151.04, 152.02, 124.02, 151.06, 123.05, 123.04, 123.07, 122.02, 147.01, 149.04, 120, and 187 in Orange County, Florida, and 217.04, 217.07, 217.06, 217.05, and 216.14 in Seminole County, Florida, qualifies as a Targeted Employment Area (TEA) under the provisions of the EB-5 Investor Visa Program. The 2015 annual average unemployment rate for the combined area was 8.1 percent, above the qualifying rate of 8.0 percent for that time period (see enclosed table).

The method used to estimate the unemployment rate in this area is called Census-share disaggregation, a standard U.S. Department of Labor, BLS procedure used to calculate rates for small subcounty areas.

Since these locations are not in a rural county or in a single Census tract with a qualifying rate, the enclosed combination qualifies as a Targeted Employment Area due to its high unemployment rate.

Please call Demetria Rollins at 850-245-7218, if you have any questions.

Sincerely,
