Ms. Zhijun Mao
12240 Village Place
Davie, Florida 33325

Dear Ms. Mao:

In response to your request, the Bureau of Labor Market Statistics has verified that 3301 College Avenue, Fort Lauderdale, Florida, in Broward County, Florida is in Census tract 702.04. The area consisting of contiguous Census tracts 410, 411, 412, 414, 428, 430.01, 431, 701.01, and 702.04 qualified as a Targeted Employment Area (TEA) under the provisions of the EB-5 Investor Visa Program. The 2014 annual unemployment rate for the combined area was 9.5 percent, above the qualifying rate of 9.3 percent for that time period (see enclosed table).

As for 2013, the area consisting of contiguous Census tracts 411, 412, 413, 414, 415, 417, 429, 608.01, 610.01, 702.04, 705.02, 706.02, 1103.07, 1103.08, 1103.21, 1103.28, 1103.35, and 1103.43 in Broward County, and 4.02, 4.05, 4.08, 4.09, 4.10, 4.11, 4.12, 4.13, 4.14, 5.01, 10.02, 10.05, 94, 95.03, 100.01, 100.06, 100.09, 100.10, 100.11, 100.12, 100.13, 100.15, and 100.16 in Miami-Dade County qualified as a TEA under the provisions of the EB-5 Investor Visa Program. The 2013 annual unemployment rate for the combined area was 11.1 percent, equal to the qualifying rate for that time period (see enclosed table).

The method used to estimate the unemployment rate in this area is called Census-share disaggregation, a standard U.S. Department of Labor, BLS procedure used to calculate rates for small subcounty areas.

Since these locations are not in a rural county or in a single Census tract with a qualifying rate, the enclosed combination qualifies as a TEA due to its high unemployment rate.

Please call Demetria Rollins at 850-245-7218, if you have any questions.

Sincerely,

Adrienne Johnston, Chief
Bureau of Labor Market Statistics

AJ/rd

Ms. Zhijun Mao
12240 Village Place
Davie, Florida 33325

Dear Ms. Mao:

In response to your request, the Bureau of Labor Market Statistics has verified that 11200 SW 8th Street, Miami, Florida, in Miami-Dade County, Florida is in Census tract 89.04. The area qualified as a Targeted Employment Area under the provisions of the EB-5 Investor Visa Program. The 2014 annual unemployment rate for the area was 10.4 percent, above the qualifying rate of 9.3 percent for that time period.

As for 2013, a contiguous combination could not be created to meet the qualifying rate.

The method used to estimate the unemployment rate in this area is called Census-share disaggregation, a standard U.S. Department of Labor, BLS procedure used to calculate rates for small subcounty areas.

Please call Demetria Rollins at 850-245-7218, if you have any questions.

Sincerely,

Adrienne Johnston, Chief
Bureau of Labor Market Statistics

Orlando, Florida 32835

Dear Ms. King:

In response to your request, the Bureau of Labor Market Statistics has verified that 4030 West Vine Street, Kissimmee, Florida, in Osceola County, Florida is in Census tract 417. The area consisting of contiguous Census tracts 417 and 416 qualifies as a Targeted Employment Area (TEA) under the provisions of the EB-5 Investor Visa Program. The 2015 annual average unemployment rate for the combined area was 8.2 percent, above the qualifying rate of 8.0 percent for that time period (see enclosed table).

The method used to estimate the unemployment rate in this area is called Census-share disaggregation, a standard U.S. Department of Labor, BLS procedure used to calculate rates for small subcounty areas.

Since these locations are not in a rural county or in a single Census tract with a qualifying rate, the enclosed combination qualifies as a TEA due to its high unemployment rate.

Please call Demetria Rollins at 850-245-7218, if you have any questions.

Mr. Carlos J. Rodriguez, Jr.
COO – Driftwood Acquisitions & Development
255 Alhambra Circle, Suite 760
Coral Gables, Florida 33134

Dear Mr. Rodriguez:

In response to your request, the Bureau of Labor Market Statistics has verified that NW 4th Street and NW 1st Avenue, Fort Lauderdale, Florida, in Broward County, Florida is in Census tract 416. The area qualifies as a Targeted Employment Area (TEA) under the provisions of the EB-5 Investor Visa Program. The 2015 annual average unemployment rate for the combined area was 9.2 percent, above the qualifying rate of 8.0 percent for that time period.

The method used to estimate the unemployment rate in this area is called Census-share disaggregation, a standard U.S. Department of Labor, BLS procedure used to calculate rates for small subcounty areas.

Please call Demetria Rollins at 850-245-7218, if you have any questions.

Sincerely,

Adrienne Johnston, Chief
Bureau of Labor Market Statistics

Mr. Carlos J. Rodriguez, Jr.
COO – Driftwood Acquisitions & Development
255 Alhambra Circle, Suite 760
Coral Gables, Florida 33134

Dear Mr. Rodriguez:

In response to your request, the Bureau of Labor Market Statistics has verified that South Dixie Highway and Trinity Place, West Palm Beach, Florida, in Palm Beach County, Florida is in Census tract 27. The area consisting of contiguous Census tracts 27, 24, 22, 17, 16, 14.02, and 15 qualifies as a Targeted Employment Area (TEA) under the provisions of the EB-5 Investor Visa Program. The 2015 annual average unemployment rate for the combined area was 8.1 percent, above the qualifying rate of 8.0 percent for that time period (see enclosed table).

The method used to estimate the unemployment rate in this area is called Census-share disaggregation, a standard U.S. Department of Labor, BLS procedure used to calculate rates for small subcounty areas.

Since these locations are not in a rural county or in a single Census tract with a qualifying rate, the enclosed combination qualifies as a Targeted Employment Area due to its high unemployment rate.

Please call Demetria Rollins at 850-245-7218, if you have any questions.

Sincerely,

Adrienne Johnston, Chief
Bureau of Labor Market Statistics

Dear Mr. Silverman:

In response to your request, the Bureau of Labor Market Statistics has verified that 1280 U.S. Highway 1, North Palm Beach, Florida, in Palm Beach County, Florida is in Census tract 5.05. The area consisting of contiguous Census tracts 5.05, 11.02, 12, 13.02, and 14.04 qualifies as a Targeted Employment Area (TEA) under the provisions of the EB-5 Investor Visa Program. The 2015 annual average unemployment rate for the combined area was 8.3 percent, above the qualifying rate of 8.0 percent for that time period (see enclosed table).

The method used to estimate the unemployment rate in this area is called Census-share disaggregation, a standard U.S. Department of Labor, BLS procedure used to calculate rates for small subcounty areas.

Since these locations are not in a rural county or in a single Census tract with a qualifying rate, the enclosed combination qualifies as a Targeted Employment Area due to its high unemployment rate.

Please call Demetria Rollins at 850-245-7218, if you have any questions.

Dear Mr. Da Silva:

In response to your request, the Bureau of Labor Market Statistics has verified that 1801 NE 123rd Street, North Miami, Florida, in Miami-Dade County, Florida is in Census tract 1.20. The area consisting of contiguous Census tracts 1.20, 1.24, 2.20, 2.18, and 12.03 qualifies as a Targeted Employment Area (TEA) under the provisions of the EB-5 Investor Visa Program. The 2014 annual average unemployment rate for the combined area was 9.3 percent, equal to the qualifying rate of 9.3 percent for that time period (see enclosed table).

The method used to estimate the unemployment rate in this area is called Census-share disaggregation, a standard U.S. Department of Labor, BLS procedure used to calculate rates for small subcounty areas.

Since these locations are not in a rural county or in a single Census tract with a qualifying rate, the enclosed combination qualifies as a Targeted Employment Area due to its high unemployment rate.

Please call Demetria Rollins at 850-245-7218, if you have any questions.

Sincerely,

Adrienne Johnston, Chief
Bureau of Labor Market Statistics

AJ/rd

In response to your request, the Bureau of Labor Market Statistics has verified that 2500 Edwards Drive, Fort Myers, Florida, in Lee County, Florida is in Census tract 803. The area consisting of contiguous Census tracts 803 and 5.02 qualifies as a Targeted Employment Area (TEA) under the provisions of the EB-5 Investor Visa Program. The 2015 annual average unemployment rate for the combined area was 9.1 percent, above the qualifying rate of 8.0 percent for that time period (see enclosed table).

The method used to estimate the unemployment rate in this area is called Census-share disaggregation, a standard U.S. Department of Labor, BLS procedure used to calculate rates for small subcounty areas.

Since these locations are not in a rural county or in a single Census tract with a qualifying rate, the enclosed combination qualifies as a Targeted Employment Area due to its high unemployment rate.

Please call Demetria Rollins at 850-245-7218, if you have any questions.

Sincerely,

Adrienne Johnston, Chief
Bureau of Labor Market Statistics
