Mr. Michael K. Evans
180 Old Main Street
South Yarmouth, Massachusetts 02664

Dear Mr. Evans:

In response to your request, the Bureau of Labor Market Statistics has verified that 191 Bradley Place, Palm Beach, Florida, in Palm Beach County, Florida is in Census tract 35.09. The area consisting of contiguous Census tracts 14.02, 14.03, 15, 16, 17, 22, 24, 27, and 35.09 qualifies as a Targeted Employment Area (TEA) under the provisions of the EB-5 Investor Visa Program. The 2014 annual average unemployment rate for the combined area was 9.4 percent, above the qualifying rate of 9.3 percent for that time period (see enclosed table).

As for year 2014, the address has been verified and the area consisting of contiguous Census tracts 18.01, 21, 22, 23, 24, and 35.09 qualified as a TEA under the provisions of the EB-5 Investor Visa Program. The 2013 annual average unemployment rate for the combined area was 11.9 percent, above the qualifying rate of 11.1 percent for that time period (see enclosed table). Also, the enclosed 2013 annual average combination was previously created and on file. If this combination had not been readily available, a determination for this address using 2013 labor force statistics could not have been made.

The method used to estimate the unemployment rate in this area is called Census-share disaggregation, a standard U.S. Department of Labor, BLS procedure used to calculate rates for small subcounty areas.

Since these locations are not in a rural county or in a single Census tract with a qualifying rate, the enclosed combination qualifies as a Targeted Employment Area due to its high unemployment rate.

Please call Demetria Rollins at 850-245-7218, if you have any questions.

Sincerely,

Adrienne Johnston, Chief
Bureau of Labor Market Statistics

Dear Mr. Halleran:

In response to your request, the Bureau of Labor Market Statistics has verified that 1001 South Miami Avenue, Miami, Florida, in Miami-Dade County, Florida is in Census tract 67.02. The area consisting of contiguous Census tracts 67.02, 36.01, 34, 31, and 27.02 qualifies as a Targeted Employment Area (TEA) under the provisions of the EB-5 Investor Visa Program. The 2014 annual average unemployment rate for the combined area was 9.8 percent, above the qualifying rate of 9.3 percent for that time period (see enclosed table).

The method used to estimate the unemployment rate in this area is called Census-share disaggregation, a standard U.S. Department of Labor, BLS procedure used to calculate rates for small subcounty areas.

Since this location is not in a rural county or in a single Census tract with a qualifying rate, the enclosed combination qualifies as a Targeted Employment Area due to its high unemployment rate.
