Downtown Fort Lauderdale Waterfront 18 LLC
c/o Arnstein and Lehr LLP
200 South Biscayne Boulevard, Suite 3600
Miami, Florida 33131
Attention: Ronald R. Fieldstone, Esquire

Dear Mr. Fieldstone:

In response to your request, the Bureau of Labor Market Statistics has verified that 413 SW 3rd Avenue, Fort Lauderdale, Florida, in Broward County, Florida is in Census tract 426. The area consisting of contiguous Census tracts 426, 416, 415, and 414 qualifies as a Targeted Employment Area (TEA) under the provisions of the EB-5 Investor Visa Program. The 2014 annual average unemployment rate for the combined area was 9.5 percent, above the qualifying rate of 9.3 percent for that time period (see enclosed table).

The method used to estimate the unemployment rate in this area is called Census-share disaggregation, a standard U.S. Department of Labor, BLS procedure used to calculate rates for small subcounty areas.

Since this location is not in a rural county or in a single Census tract with a qualifying rate, the enclosed combination qualifies as a Targeted Employment Area due to its high unemployment rate.

Please call Demetria Rollins at 850-245-7218, if you have any questions.

Sincerely,

Adrienne Johnston, Chief
Bureau of Labor Market Statistics

AJ/rd

Mr. Roger Bernstein Osberg-Braun, PL
11900 Biscayne Boulevard, Suite 700
Miami, Florida 33181

To whom it may concern:

In response to your request, the Bureau of Labor Market Statistics has verified that 19086 Northeast 29th Avenue, Aventura, Florida, in Miami-Dade County, Florida is in Census tract 1.13. The area consisting of contiguous Census tracts 1.13, 1.34, 1.22, 2.11, 2.02, and 2.13 in Miami-Dade County qualifies as a Targeted Employment Area (TEA) under the provisions of the EB-5 Investor Visa Program. The 2014 annual average unemployment rate for the combined area was 9.7 percent, above the qualifying rate of 9.3 percent for that time period (see enclosed table).

The method used to estimate the unemployment rate in this area is called Census-share disaggregation, a standard U.S. Department of Labor, BLS procedure used to calculate rates for small subcounty areas.

Since this location is not in a rural county or in a single Census tract with a qualifying rate, the enclosed combination qualifies as a Targeted Employment Area due to its high unemployment rate.

Please call Demetria Rollins at 850-245-7218, if you have any questions.

Sincerely,

Adrienne Johnston, Chief
Bureau of Labor Market Statistics

Mr. Frankie Malekian
Chicago Foreign Investment Group, LLC
111 East Wacker Drive, Suite 555
Chicago, Illinois 60601

Dear Mr. Malekian:

In response to your request, the Bureau of Labor Market Statistics has verified that the Southwest corner of Powell Road and County Road 144, Wildwood, Florida, in Sumter County, Florida is in Census tract 9114. The area consisting of contiguous Census tracts 9114 and 9113.02 in Sumter County qualifies as a Targeted Employment Area (TEA) under the provisions of the EB-5 Investor Visa Program. The 2014 annual average unemployment rate for the combined area was 11.0 percent, above the qualifying rate of 9.3 percent for that time period (see enclosed table).

For year 2012, this address qualified as a targeted employment area due to being in Sumter County which was a rural county as defined by the provisions of the EB-5 Investor Visa Program. The entire county qualified as a Targeted Employment Area at that time because it was not located in a Metropolitan Statistical Area and did not have any incorporated cities with a population of 20, 000 or more.

The method used to estimate the unemployment rate in this area is called Census-share disaggregation, a standard U.S. Department of Labor, BLS procedure used to calculate rates for small subcounty areas.

Since this location is not in a rural county or in a single Census tract with a qualifying rate, the enclosed combination qualifies as a Targeted Employment Area due to its high unemployment rate.

Please call Demetria Rollins at 850-245-7218, if you have any questions.

Sincerely,

Adrienne Johnston, Chief
Bureau of Labor Market Statistics

Joe Nguyen
Vice President
New Orleans and Gulf Coast Regional Center
1848 Commercial Drive
Harvey, Louisiana 70058

Dear Mr. Nguyen:

In response to your request, the Bureau of Labor Market Statistics has verified that 7718 Front Beach Road, Panama City Beach, Florida, in Bay County, Florida is in Census tract 26.03. The area consisting of contiguous Census tracts 26.03, 26.01, 24, 23, and 22 in Bay County qualifies as a Targeted Employment Area (TEA) under the provisions of the EB-5 Investor Visa Program. The 2014 annual average unemployment rate for the combined area was 9.8 percent, above the qualifying rate of 9.3 percent for that time period (see enclosed table).

The method used to estimate the unemployment rate in this area is called Census-share disaggregation, a standard U.S. Department of Labor, BLS procedure used to calculate rates for small subcounty areas.

Since this location is not in a rural county or in a single Census tract with a qualifying rate, the enclosed combination qualifies as a Targeted Employment Area due to its high unemployment rate.

Please call Demetria Rollins at 850-245-7218, if you have any questions.

Sincerely,

Adrienne Johnston, Chief
Bureau of Labor Market Statistics

Mr. Kevin Wright
c/o Wright Johnson
13400 Riverside Drive, Suite 120
Sherman Oaks, California 91423

Dear Mr. Wright:

In response to your request, the Bureau of Labor Market Statistics has verified that 67 SW 8th Street, Miami, Florida, in Miami-Dade County, Florida is in Census tract 67.02. The area consisting of contiguous Census tracts 67.02, 36.01, 34, 31, and 27.02 qualifies as a Targeted Employment Area (TEA) under the provisions of the EB-5 Investor Visa Program. The 2014 annual average unemployment rate for the combined area was 9.8 percent, above the qualifying rate of 9.3 percent for that time period (see enclosed table).

The method used to estimate the unemployment rate in this area is called Census-share disaggregation, a standard U.S. Department of Labor, BLS procedure used to calculate rates for small subcounty areas.

Since this location is not in a rural county or in a single Census tract with a qualifying rate, the enclosed combination qualifies as a Targeted Employment Area due to its high unemployment rate.

Please call Demetria Rollins at 850-245-7218, if you have any questions.

Sincerely,

Adrienne Johnston, Chief
Bureau of Labor Market Statistics

AJ/rd

Attn: Ronald R. Fieldstone, Esquire

Dear Mr. Fieldstone:

In response to your request, the Bureau of Labor Market Statistics has verified that 200 East Las Olas Boulevard, Fort Lauderdale, Florida, in Broward County, Florida is in Census tract 425. The area consisting of contiguous Census tracts 415, 416, 417, and 425 qualifies as a Targeted Employment Area (TEA) under the provisions of the EB-5 Investor Visa Program. The 2014 annual average unemployment rate for the combined area was 9.5 percent, above the qualifying rate of 9.3 percent for that time period (see enclosed table).

The method used to estimate the unemployment rate in this area is called Census-share disaggregation, a standard U.S. Department of Labor, BLS procedure used to calculate rates for small subcounty areas.

Since this location is not in a rural county or in a single Census tract with a qualifying rate, the enclosed combination qualifies as a Targeted Employment Area due to its high unemployment rate.

Please call Demetria Rollins at 850-245-7218, if you have any questions.

Sincerely,

Adrienne Johnston, Chief
Bureau of Labor Market Statistics

AJ/rd
