Maitland, Florida 32751

To Whom It May Concern:

In response to your request, the Bureau of Labor Market Statistics has verified that 15800 Beachwalk Boulevard in Lee County, Florida is in Census tract 19.06. The area consisting of contiguous Census tracts 3.02, 5.02, 5.03, 6, 7, 11.01, 11.02, 12.01, 13, 15.02, 17.03, and 19.06 qualifies as a Targeted Employment Area (TEA) under the provisions of the EB-5 Investor Visa Program. The 2013 annual average unemployment rate for the combined area was 11.5 percent, above the qualifying rate of 11.1 percent for that time period (see enclosed table).

The method used to estimate the unemployment rate in this area is called Census-share disaggregation, a standard U.S. Department of Labor, Bureau of Labor Statistics procedure used to calculate rates for small subcounty areas.

Since this area is located in the Cape Coral-Ft. Myers Metropolitan Statistical Area, it is not considered a rural area. The area does qualify as a TEA however, due to its high unemployment rate.

Please call Demetria Rollins at 850-245-7218, if you have any questions.

Sincerely,

Kathie Hughes, Program Manager
Bureau of Labor Market Statistics

4709 Cap Rock Drive
Austin, Texas 78735

Dear Mr. Kester:

In response to your request, the Bureau of Labor Market Statistics has verified that the intersection of Avalon Road and Walker Springs in Jefferson County, Florida is in Census tract 2502. The area consisting of contiguous Census tracts 2502 in Jefferson County and 26.04, 18.02, 10.02, 10.01, 11.01, 19.01, 4, 12, 5, 13, and 6 in Leon County qualifies as a Targeted Employment Area (TEA) under the provisions of the EB-5 Investor Visa Program. The 2013 annual average unemployment rate for the combined area was 13.0 percent, above the qualifying rate of 11.1 percent for that time period (see enclosed table).

The method used to estimate the unemployment rate in this area is called Census-share disaggregation, a standard U.S. Department of Labor, Bureau of Labor Statistics procedure used to calculate rates for small subcounty areas.

Since this area is located in the Tallahassee Metropolitan Statistical Area, it is not considered a rural area. The area does qualify as a TEA however, due to its high unemployment rate.

Please call Demetria Rollins at 850-245-7218, if you have any questions.

Mr. Lorenzo M. Lleras
230 NW 76th Drive, Suite A
Gainesville, Florida 32607

Dear Mr. Lleras:

In response to your request, the Bureau of Labor Market Statistics has verified that 25818 SW Kanner Highway in Martin County, Florida is in Census tract 18.02. The area consisting of contiguous Census tracts 18.02 in Martin County and 80.01 and 80.02 in Palm Beach County qualifies as a Targeted Employment Area (TEA) under the provisions of the EB-5 Investor Visa Program. The 2013 annual average unemployment rate for the combined area was 14.8 percent, above the qualifying rate of 11.1 percent for that time period (see enclosed table).

The method used to estimate the unemployment rate in this area is called Census-share disaggregation, a standard U.S. Department of Labor, Bureau of Labor Statistics procedure used to calculate rates for small subcounty areas.

Since this area is located in the Port St. Lucie Metropolitan Statistical Area and Miami-Ft. Lauderdale-West Palm Beach Metropolitan Statistical Area, it is not considered a rural area. The area does qualify as a TEA however, due to its high unemployment rate.

Please call Demetria Rollins at 850-245-7218, if you have any questions.

Sincerely,

Rebecca Rust, Chief
Bureau of Labor Market Statistics

Dear Ms. Kofler:

In response to your request, the Bureau of Labor Market Statistics has verified that 6910 NW 12th Street in Miami-Dade County, Florida is in Census tract 91. The area consisting of contiguous Census tracts 57.01, 57.04, 58.01, 58.02, 90.10, 90.24, 90.26, 90.27, 90.29, 90.30, 90.35, and 91 qualifies as a Targeted Employment Area (TEA) under the provisions of the EB-5 Investor Visa Program. The 2013 annual average unemployment rate for the combined area was 11.2 percent, above the qualifying rate of 11.1 percent for that time period (see enclosed table).

The method used to estimate the unemployment rate in this area is called Census-share disaggregation, a standard U.S. Department of Labor, Bureau of Labor Statistics procedure used to calculate rates for small subcounty areas.

Since this area is located in the Miami-Ft. Lauderdale-West Palm Beach Metropolitan Statistical Area, it is not considered a rural area. The area does qualify as a TEA however, due to its high unemployment rate.

Please call Demetria Rollins at 850-245-7218, if you have any questions.

Sincerely,

Rebecca Rust, Chief
Bureau of Labor Market Statistics
